Every service, clearly laid out

CCTV, alarms, intercoms, video doorbells, Wi-Fi, cabling, smart home and access control, each with its own photo, summary and page.

What we install

Residential and commercial security, smart home automation, Wi-Fi and data upgrades.

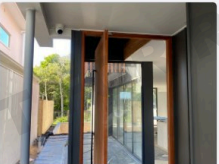

CCTV security systems
Security cameras and recorders for homes and businesses, planned around the areas that matter and installed by licensed technicians.
[See cctv security systems](#)

Alarm systems
Alarm systems tailored to the property, from a basic setup to an advanced system, installed and explained by licensed technicians.
[See alarm systems](#)

Intercoms
See and speak to whoever is at the door or gate, installed and connected by a licensed Sunshine Coast team.
[See intercoms](#)

Video doorbells
A doorbell that shows you who is there, installed neatly and connected properly.
[See video doorbells](#)

Wi-Fi upgrades
Better Wi-Fi coverage and faster internet across the property, from access points to a network upgrade.
[See wi-fi upgrades](#)

Structured cabling
Data cabling run properly for cameras, Wi-Fi and networks, by a registered open cabler.
[See structured cabling](#)

Smart home automation
Smart devices set up and integrated so your security and home work together.
[See smart home automation](#)

Access control
Control who gets in and when, with access control installed as part of a commercial security system.
[See access control](#)

Also from EVERTEQ [Residential security systems](#) [Commercial security systems](#) [CCTV repairs and fault finding](#) [System handover and induction](#)

04 Plan your coverage

An interactive floor plan shows where cameras, alarm sensors, intercoms, Wi-Fi and cabling usually go on a Sunshine Coast home. Visitors can switch layers and arm the alarm.

Plan your coverage

Every property is different, so every system is too. Tap a layer to see where each kind of device usually goes on a typical Sunshine Coast home.

REVIEW 01

We had the pleasure of getting Troy to look after installation of our cameras and the whole experience was great.

We had the pleasure of getting Troy to look after installation of our cameras and the whole experience was great. Professional, great communication, pricing and a seamless install. The after sales support has also been outstanding. Highly recommend Evertiq. Great family owned business, support local!

We recently had Troy install security cameras at our two two-storey houses, one after the other, and we couldn't be happier with the service he provided. Both installations were completed professionally and exactly as we requested. Troy was patient and worked through every challenge that arose during the installation to ensure all of our requirements were met. The systems worked perfectly from day one. We highly recommend Troy to anyone looking for a reliable and professional security camera installer. His workmanship, attention to detail, and excellent customer service are outstanding.

REVIEW 04

Troy installer 3x security cameras for us 2 years ago.

Troy installer 3x security cameras for us 2 years ago. For some reason they had disconnected and stopped working a few months ago. Troy tried to help me troubleshoot over the phone but to no avail. He then came out and fixed the connection and went above and beyond and labelled all our cord connections so we knew what was what. Highly recommend Troy!

REVIEW 05

We recently had Troy install our security cameras and couldn't be happier with the service.

We recently had Troy install our security cameras and couldn't be happier with the service. He was professional, patient, and really took the time to explain how everything worked. Communication was excellent from start to finish, he turned up when he said he would and made sure everything was set up properly before leaving and returned to explain all to my husband. The system works perfectly, and we feel so much more confident knowing our home is secure. Highly recommend Troy to anyone looking for reliable, friendly, and knowledgeable service.

After being let down by another company not showing up to the job, I straight away got on google to look for someone else and after reading all the reviews from evertiq I knew straight away this was the right company to contact and I wasn't wrong! Troy from evertiq come and fixed the issues I was having with my camera system and showed up on time and also showed up the following day of first contacting him, how's that for customer service.

A gallery of EVERTEQ jobs, from beachside pole cameras to underground cabling runs. Each photo opens full size.

07 How a job works

Four clear steps, from telling EVERTEQ what you need to a tailored package, a licensed install and a full induction, so customers know what happens before they pick up the phone.

From first call to fully set up

Every system is tailored, installed properly and explained before we leave.

00:01

Tell us what you need

Answer a few questions about the property and what you want to protect, or give us a call.

00:02

A package tailored to you

Cameras, alarms, intercoms or Wi-Fi, chosen for your property rather than one size fits all.

00:03

Licensed installation

Installed by licensed, qualified technicians and integrated with what you already have.

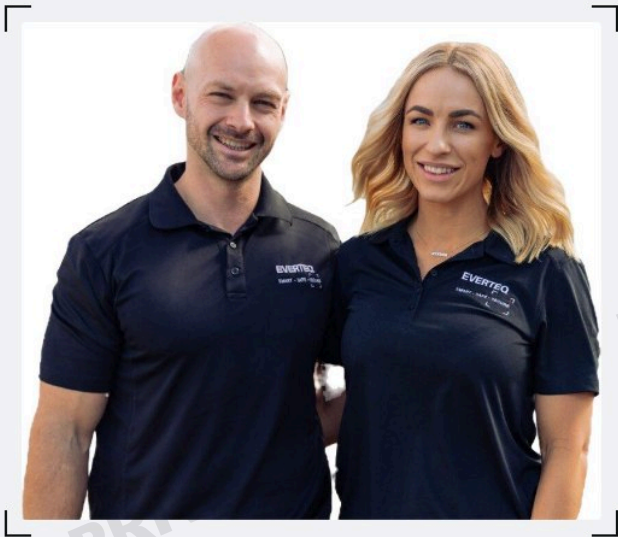

00:04

Induction and support

An in-depth walk-through of your system, and help afterwards if you need it.

08 The family behind EVERTEQ

A family-owned, locally operated team, with the Security Licence and Open Cabling registration shown properly instead of only in the footer.

A family business, locally owned and operated

Welcome to EVERTEQ. We are a family business, locally owned and operated, and we genuinely care about every one of our clients. We pride ourselves on exceptional customer service.

We offer residential and commercial security systems, smart home automation, Wi-Fi and data upgrades, wired and wireless, basic or advanced. Every product is installed by licensed, qualified technicians and integrated to suit your needs, followed by an in-depth induction so you understand exactly how it all works.

lead + upgrade

4 messages on /cctv-security-systems

Customer: How many cameras would I need for a 4 bedroom house in Caloundra?

Assistant: Most 4 bedroom homes are well covered with 4 to 6 cameras: front entry, driveway, both sides and the backyard. Troy can confirm the layout on a free site visit.

Customer: Can I see them on my phone?

Assistant: Yes. Every system is set up with app viewing, and the install finishes with a full induction. I have your details, Troy will be in touch to book a time.
